Guarantee water with no bacteria or virus	△	-	✓
Filters out pesticides and herbicides	△	-	✓
Treats heavy metals and manganese	△	-	✓
Environment friendly without chemical treatment or salt rejection	✓	-	✓
Detection of leaks in the water network	-	-	✓
Can be controlled remotely	-	-	✓

✓ Yes - No
△ Treatment level depending on type of filtration solutions

PROTECTION

Komeo neutralizes scaling and thus protects the entire household system by preserving the original mineral levels in the water and detects leaks.

ECONOMY

Electricity use adapts to the flow of water treated. By eliminating scaling in the system, Komeo extends the service life of household appliances and sanitary equipment.

WELL-BEING

Komeo offers superior water quality by filtering the micro-pollutants and heavy metal found in tap water. It removes the taste of chlorine.

ECOLOGY

Komeo is an alternative to buying bottled water and thus eliminates use of plastics. It is environment-friendly by remaining free of any chemical treatment, salt rejection or overconsumption of water.

KOMEO IS THE ALTERNATIVE TO BUYING MINERAL WATER

1000 bottles saved /year

No transportation

No packaging

For a family of four drinking an average of one liter of water per day.

OUR FOUR AREAS OF EXPERTISE

CONTROL

COMAP's control solutions make it possible to provide the right flow in the right place for heating, air-conditioning or hot water systems.

CONNECTION

COMAP offers a wide range of complete connection systems, in multilayer, in PER and in copper.

WATER QUALITY

COMAP solutions are based on soft technologies and are environment friendly, resulting in healthy and high quality water in residential buildings.

TAPS, MIXERS & SHOWERS

COMAP sells an exclusive range of taps, mixers and showers for kitchen and bathroom: custom, functional and reliable solutions.

To learn more and discover the full range, contact your COMAP sales representative.

COMAP

A leading partner in thermal and sanitary solutions, striving for the comfort and environmental performance of buildings. French experts for nearly 100 years in the fields of plumbing and HVAC, our solutions integrate harmoniously into living areas. With nearly 1,000 employees, we design and manufacture control-regulation, connection, water quality and sanitary tap solutions. They enable intelligent management of water and energy and contribute to the comfort and well-being of occupants worldwide. COMAP is a company of the Aalberts group, which registered turnover of 2.694 bn in 2017.

Komeo

Water treatment system

A COMPREHENSIVE WATER TREATMENT SOLUTION

Komeo eliminates scaling in water systems and purifies all the water in the household. It is the only solution that guarantees protection of the household and optimal quality of drinking water in a single device.

For more than 30 years, COMAP has been designing and manufacturing solutions that improve the quality of tap water and contribute to the well-being of living spaces.

We offer the following to facilitate installation and maintenance:

- quick installation solutions, without commissioning,
- the complete support of our technical teams,
- availability of our products thanks to our extensive distribution network.

Most water treatment solutions require simple but essential maintenance throughout the life of the appliance. The installation of this type of equipment often provides the opportunity to offer maintenance contracts.

Made in FRANCE

Komeo is manufactured in France in the COMAP group's Montélier factory. This facility is located in the Drôme region and is ISO-9001 certified.

3-YEAR WARRANTY

We offers a three-year warranty for parts and labour (excluding consumables).

COMAP

PROFESSIONAL TREATMENT FOR THE ENTIRE HOUSEHOLD

Komeo is installed within one hour.

This attractive and compact unit can be installed anywhere after the main water supply point.

Consumables are easily accessible and the pre-filter's automatic purge function makes servicing easy.

+ SYSTEM DURABILITY

Electronic anti-scaling extends the lifespan of the unit and appliances by de-scaling the entire water network.

+ QUALITY OF DRINKING WATER

Activated carbon filters

- Treat the heavy metals present in water, including arsenic, lead, aluminium, chromium, mercury and others.
- Reduce micro-pollutants such as pesticides, herbicides and dissolved organic matter harmful to health.
- Improve water quality by retaining excess manganese and iron.
- Remove the taste of chlorine.

+ SYSTEM SAFETY

The flow meter and pressure sensors detect leaks and overpressure, then automatically shut off the system when these occur.

QUICK INSTALLATION, EASY MAINTENANCE

- The installation can be achieved within one hour using a template and simple installation instructions.
- No commissioning is required as Komeo's features are operative immediately upon installation. The consumables (filters and lamp) are pre-assembled and Komeo is pre-configured.
- Maintenance is easy thanks to quickly accessible consumables and the automatic pre-filter purge function.
- With an attractive and compact design, Komeo is installed against a wall.

+ COMMUNICATION

A touch screen and an application to keep the user informed:

- Quick and easy configuration of Komeo (water hardness, UVc lamp programming, etc.)
- Real-time information on water consumption and wear of cartridges and filters, as well as alerting users of any malfunctions.
- Facilitates the replacement of consumables with integrated tutorials.
- Use an application for tablet and smartphone to control all of these operations remotely.

+ TREATMENT PERFORMANCE

Komeo is equipped with a UVc lamp that:

- Neutralizes bacteria and viruses and prevents the development of legionella bacteria in the water system.
- Adapts use of energy to the volume of water to be treated.

theplus by COMAP

DETECTION OF LEAKS

Komeo detects possible leaks in the home: thanks to its sensors and its flowmeter, the unit identifies all leaks in the system and automatically cuts off the water supply when one is detected.
